

In February 2019 10 a group from my school were at traineeship in Austria, in Alpine town named Fusch an der Großglocknerstraße.

During first week everyone were familiarizing with their workplaces such as kitchen assistance, restaurant, room service and sink. We also had time for integration. We played board games, had movie nights, played games like Just Dance and we went for a trip to Bad Fusch. The trip was tiring but it was worth it. The views were beautiful and water from the spring delicious. We also had a small Valentines day party together. We made a giant snowman, we spent some time in Zell am See.

Mr. Sławek and Mrs. Ela took us to Kitzsteinhorn Glacier which is 3203 meters high. On top of it was a viewing platform from which we could see whole roof of Europe. In evenings we were spending time together. During whole stay we visited Touris Information where we saw a marmot and travelled into the world of Hohe Tauern National Park. Some of us went went to Salzburg and had a good time in the city of Mozart.

As part of the workshops we got experience in marketing in grocery-industrially wholesale AGM. We had a chance to taste local foods and drinks for example Kasnocken or Germknödel. We got very familiar with tradition and culture of Austria because all of us had to make a presentation about it. During this month we became a good team but unfourtenately everything that's good end quickly.
